

EcoDose 2K

2K Dosing Unit

Description

The **EcoDose 2K** is an electronic dosing system suitable for high and low pressure applications. It can be used in manual and automatic processes. Optimized for quick color changes and easy flushing, it enhances resource utilization and contributes to higher

application efficiency. Fluids are measured consistently and precisely, even media with different viscosities. Typical fluids handled are 1 or 2K materials, water and solvent based paints, varnishes, lacquers and monolayer paints.

Customer Benefits

- » Flow rate measuring by Coriolis or gear flowmeter
- » Exact volume controlled dosing of both components
- » High and constant mix accuracy
- » Monitoring of all dosing functions such as pot life, catalysis ratio and components A & B with dedicated alarm
- » Automatic color change controlled by volume
- » Independent flushing circuits for both components
- » No premixing chamber
- » Smooth start-up procedure
- » Intuitive user interface for quick programming of individual settings
- » High process reliability
- » Tested according to Dürr quality standards
- » ATEX fluid section Ex II 2G IIA T6
