

EcoGun 2100

Manual Spray Gun Air Assist

Description

The **EcoGun 2100** perfectly suits air assisted paint application with pressures up to 250bar and can be used for water and solvent-borne coating materials. It has been designed especially for paint application in the machining and wood working industry.

The **EcoGun 2100** offers a wide range of high-pressure spray tips. The complete material path is made of stainless steel and there are two options for material filtration with three different mesh sizes.
