

# EcoGun 256

## Manual Spray Gun Air Assist

### Description

With an operating pressure of up to 250bar, the **EcoGun 256** is the perfect solution for air assisted paint application and is equally suitable for solvent and water-based coating materials, mainly used in machining and wood working sectors. Beneficial highlights are a material path manufactured

completely of stainless steel, sealings in contact with applied materials of modified plastics, such as PTFE, PE-UHMW, POM, and the availability of a closing valve (valve ball and seat) in tungsten carbide version. The **EcoGun 256** offers a wide range of high-pressure spray nozzles with three optional material inlets.

### Customer Benefits

- » Nickel plated body for easy cleaning and durability
- » Ensured conductivity of the spray gun body for safe grounding
- » Perfectly balanced ergonomic shape of spray gun body that minimizes fatigue
- » Parts contacted by media in stainless steel
- » External material supplying part allows application of heated paint
- » Spray pattern shape regulation
- » Maximum fluid pressure 250bar
- » Three material inlet versions
- » Easy cleaning and maintenance
- » ATEX EX II 2G T60°C X
