

# EcoGun AL AUTO

## Automatic Airless Spray Gun

### Description

With an operating pressure of up to 300bar, the **EcoGun** AL AUTO is an outstanding solution for airless paint applications and is equally suitable for solvent and water-based coating materials, mainly used in automated machining, construction and wood working sectors. Beneficial highlights are a material path manufactured completely of stainless steel, sealings in

contact with applied materials of modified plastics, such as PTFE, PE-UHMW, POM, and the availability of a closing valve (valve ball and seat) in tungsten carbide version. The **EcoGun** AL AUTO offers a wide range of high-pressure spray nozzles. During the development of this spray gun the aim was to keep it easy to clean and maintain at all times.

### Customer Benefits

- » Parts contacted by media in stainless steel
- » Wide range of turnable spray nozzles
- » Optional extensions
- » Max. fluid pressure 300bar
- » Two material inlets (circulation possible)
- » Easy cleaning and maintenance
- » ATEX Ex II 2G T6 X
