

Pressure Pot 20 A

Description

The Pressure Pot 20 A has a volume of 20 liters and is suitable for solvent borne materials supplying either manual or automatic spray guns. It is equipped with an agitator for manual preparation of paint before application. The pressure pot and its material path are

made of high-grade steel with a PTFE coating ensuring easy maintenance and durability. Its inner steel pot is made of stainless steel. Thanks to four integrated wheels the pressure pot can be moved easily.

Customer Benefits

- » Simple and robust design
- » PTFE coating for better maintenance
- » Four wheels for easy carriage
- » Pressure valve to ensure maximal operating pressure
- » Material path made of high-grade steel
